Omicron Variant Operating Procedures update 17/12/2021

Dear fellow member,

Following the recent developments regarding the rapidly spreading Omicron variant of Covid-19, the Board confirm that the airfield and flight school remain open, but we have introduced the following risk mitigation measures:

Masks are mandatory within the club house.

No more than 8 people to be in the clubhouse at any time

Contract tracing 'sign in' is essential

Staff (Management, Instructors and IF pilots) will perform a Lateral Flow Test each day before visiting the site

All students/members wishing to fly with an instructor must have a negative lateral flow test performed on the day of their visit.

I.F. and Trial lesson students must produce a negative lateral flow test on the day of their flight before visiting the site.

Mask wearing is essential inside our aircraft

Aircraft interiors must be cleansed with antiviral agents after each and every flight.
